#### Change in Asset Allocation Pattern/Portfolio Rebalancing

#### Rebalancing of deviation due to short term defensive consideration:

Any alteration in the investment pattern will be for a short term on defensive considerations as per Clause 1.14.1.2 of SEBI Master Circular dated June 27, 2024, the intention being always to protect the interests of the Unit Holders and the Scheme shall rebalance the portfolio within 7 calendar days.

#### Portfolio rebalancing in case of passive breach

In line with Clause 3.5.3.11 of SEBI Master Circular dated June 27, 2024, in case of change in constituents of the index due to periodic review, the portfolio of Scheme shall be rebalanced within 7 calendar days. Further, any transactions undertaken in the portfolio of Index Schemes to meet the redemption and subscription obligations shall be done ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

In the event of involuntary corporate action, the scheme shall dispose the security not forming part of the underlying index within 7 calendar days from the date of allotment/listing.

#### **Tracking Error:**

The Scheme, in general, will hold all the securities that constitute the Underlying Index in the same proportion as the index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low.

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is not expected to exceed by [2.00%] p.a. (based on daily rolling returns for last 12 months). However, in case of events like, Dividend issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the underlying basket, etc. or in abnormal market circumstances, the tracking error may exceed the above mentioned limits.

#### 7. Investment Strategy

HDFC Nifty Top 20 Equal Weight Index Fund will be managed passively with investments in stocks comprising the Underlying Index subject to tracking errors. The investment strategy would revolve around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Index as well as the incremental collections/redemptions in the Scheme. A part of the funds may be invested in debt and money market instruments, to meet liquidity requirements.

Since the Scheme is index fund, it will only invest in securities constituting the Underlying Index. However, due to corporate action in companies comprising the index, the Scheme may be allocated/allotted securities which are not part of the index. Such holdings would be rebalanced within 7 Calendar Days from the date of allotment / listing of such securities

As part of the Fund Management process, the Scheme may use derivative instruments such as index futures and options, or any other derivative instruments that are permissible or may be permissible in future under applicable regulations. However, trading in derivatives by the Scheme shall be for restricted purposes as permitted by the regulations.

For detailed derivative strategies, please refer to SAI.

Subject to the Regulations and the applicable guidelines, the Scheme may engage in Stock Lending activities. The Scheme may also invest in the debt schemes of Mutual Funds for liquidity purposes.

Though every endeavor will be made to achieve the objective of the Scheme, the AMC/Sponsor/Trustee do not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

#### 8. Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

#### (i) Risks associated with Passive Investments:

As the Scheme proposes to invest not less than 95% of the net assets in the securities of the Underlying Index in the same proportion, the Scheme will not be actively managed. Performance of the Underlying Index will have a direct bearing on the performance of the Scheme. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its Underlying Index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

Further, it is pertinent to note that there is no element of research recommendations involved before the execution of trades in the Scheme. The decision of the Fund Manager to execute trades including rebalancing required will be purely driven by the inflows and outflows in the Scheme and composition of the Underlying Index.

#### (ii) Tracking Error/Tracking Difference Risk:

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the Underlying Index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the Underlying Index and regulatory policies which may affect AMC's ability to achieve close correlation with the Underlying Index of the Scheme. The Scheme's returns may therefore deviate from those of its Underlying Index.

"Tracking Error" is defined as the standard deviation of the difference in daily returns between the Scheme and the Underlying Index annualized over 1 year period. Tracking difference is the difference of returns between the Scheme and the index annualized over 1 year, 3 year, 5 year, 10 year and since the scheme inception period. Tracking Error / Tracking Difference may arise including but not limited to the following reasons: -

- a. Expenditure incurred by the Scheme.
- b. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The Scheme may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- c. Securities trading may halt temporarily due to circuit filters.
- d. Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
- e. Rounding off of quantity of shares in Underlying Index.
- f. Dividend received from underlying securities.
- g. Disinvestments by Scheme to meet redemptions, recurring expenses, etc.
- h. Execution of large buy / sell orders
- Transaction cost (including taxes and insurance premium), recurring expenses and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees
- j. Realisation of Unit holders' funds
- k. The Scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to: circuit filters in the securities, liquidity and volatility in security prices.
- I. The Index reflects the prices of securities at a point in time, which is the price at close of business day on BSE / National Stock Exchange of India Limited (NSE). The Scheme, however, may at times trade these securities at different points in time during the trading session and therefore the prices at which the Plan trade may not be identical to the closing price of each scrip on that day on the BSE / NSE. In addition, the Scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from BSE / NSE closing prices.
- m. In case of investments in derivatives like index futures, the risk reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is relatively new market.

It will be the endeavour of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum for daily 12 month rolling return. However, in case of corporate action events like, dividend received from underlying securities, rights issue from underlying securities or market events like circuit filters in the securities and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

#### (iii) Stock Liquidity in the event of Circuit Filter

Liquidity of stocks which are available only in cash segment and not in F&O segment gets adversely impacted in the event of a circuit filter imposed by any of the stock exchanges. Further, this may result in gain/loss to existing unit holders when finally the purchase / sale of that stock is executed. This would also create tracking error while comparing returns with benchmark.

Transaction type	Upper circuit	Lower circuit
Subscription	The Scheme shall buy stocks as per basket wherever no circuit, In case of Circuit on any stock(s) in the basket, the Scheme shall:  1. Hold cash for stock(s) on circuit; 2. Buy the stock(s) immediately when circuit is open This may impact performance and result in tracking error.	
Redemption	NA	The Scheme shall sell stocks as per basket if no circuit. In case of circuit on Stock(s) in the basket, the Scheme shall:  1. Pay from cash or cash equivalent or create cash to pay for stocks on circuit by selling other stocks which may impact performance and result in tracking error;  2. Sell stock immediately when circuit is open and rebalance portfolio which may impact performance and result in tracking error.

#### (iv) Risk factors associated with investing in equities and equity related instruments

- Equity shares and equity related instruments are volatile and prone to price fluctuations on a daily basis. Investments in equity shares and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risks.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid
  in nature and carry a larger amount of liquidity risk, in comparison to securities
  that are listed on the exchanges. Investment in such securities may lead to
  increase in the scheme portfolio risk.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Scheme incurring losses till the security is finally sold.
- Scheme's performance may differ from the benchmark index to the extent of the investments held in the debt segment, as per the investment pattern indicated under normal circumstances.

#### (v) Risk factors associated with investing in Fixed Income Securities

The Scheme will invest not less than 95% of its corpus in the securities representing the Underlying Index as this Scheme endeavours to earn returns that correspond to the total returns represented by the Underlying Index. The Scheme will have insignificant cash or debt/money market investments. Therefore, the Scheme is not significantly susceptible to risks associated with debt/money markets.

- The Net Asset Value (NAV) of the Scheme, to the extent invested in Debt and Money Market instruments, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Money market instruments, while fairly liquid, lack a well developed secondary
  market, which may restrict the selling ability of the Scheme and may lead to the
  Scheme incurring losses till the security is finally sold.
- Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.
- Investment in Debt instruments are subject to varying degree of credit risk or
  default (i.e. the risk of an issuer's inability to meet interest or principal
  payments on its obligations) or any other issues, which may have their credit
  ratings downgraded. Changes in financial conditions of an issuer, changes in
  economic and political conditions in general, or changes in economic or and
  political conditions specific to an issuer, all of which are factors that may have
  an adverse impact on an issuer's credit quality and security values. The
  Investment Manager will endeavour to manage credit risk through in-house
  credit analysis. This may increase the risk of the portfolio.
- Government securities where a fixed return is offered run price-risk like any
  other fixed income security. Generally, when interest rates rise, prices of fixed
  income securities fall and when interest rates drop, the prices increase. The
  extent of fall or rise in the prices is a function of the existing coupon, days to
  maturity and the increase or decrease in the level of interest rates. The new level
  of interest rate is determined by the rates at which government raises new
  money and/or the price levels at which the market is already dealing in existing

securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.

- The Scheme's performance may differ from the benchmark index to the extent
  of the investments held in the debt segment, as per the investment pattern
  indicated under normal circumstances.
- Prepayment Risk: Certain fixed income securities give an issuer the right to
  call back its securities before their maturity date, in periods of declining interest
  rates. The possibility of such prepayment may force the Scheme to reinvest the
  proceeds of such investments in securities offering lower yields, resulting in
  lower interest income for the Scheme.
- Reinvestment Risk: This risk refers to the interest rate levels at which cash
  flows received from the securities in the Scheme are reinvested. The additional
  income from reinvestment is the "interest on interest" component. The risk is
  that the rate at which interim cash flows can be reinvested may be lower than
  that originally assumed.
- Settlement risk: Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested, and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.

#### (vi) Risk factors associated with investment in Tri-Party Repo

The Mutual Fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus, reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL).

As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus, the Scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the Scheme may lose an amount equivalent to its contribution to the default fund.

#### (vii) Risk factors associated with investing in Derivatives

- The AMC, on behalf of the Scheme may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
- Credit Risk: The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.

- Market Risk: Market movements may adversely affect the pricing and settlement of derivatives.
- Illiquidity risk: This is the risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.

#### (viii) Risks associated with Securities Lending

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The scheme may not be able to sell lent out securities, which can lead to temporary illiquidity & loss of opportunity.

#### (ix) Risk factors associated for investments in Mutual Fund Schemes

The Scheme may invest in units of Liquid and Overnight Schemes for liquidity purposes only.

- Movements in the Net Asset Value (NAV) of these Schemes may impact the performance. Any change in the investment policies or fundamental attributes of these Schemes will affect the performance of the Scheme to the extent of investment in such schemes.
- 2. Redemptions by in these Schemes would be subject to applicable exit loads.

#### (x) General Risk Factors

- Trading volumes, settlement periods and transfer procedures may restrict the
  liquidity of the investments made by the Scheme. Different segments of the
  Indian financial markets have different settlement periods and such periods
  may be extended significantly by unforeseen circumstances leading to delays
  in receipt of proceeds from sale of securities. The NAV of the Units of the
  Scheme can go up or down because of various factors that affect the capital
  markets in general.
- As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances, as described under section 'Restrictions, if any, on the right to freely retain or dispose of units being offered'.
- At times, due to the forces and factors affecting the capital market, the Scheme
  may not be able to invest in securities falling within its investment objective
  resulting in holding the monies collected by it in cash or cash equivalent or
  invest the same in other permissible securities / investments amounting to
  substantial reduction in the earning capability of the Scheme. The Scheme may
  retain certain investments in cash or cash equivalents for its day-to-day
  liquidity requirements.
- Performance of the Scheme may be affected by political, social, and economic developments, which may include changes in government policies, diplomatic conditions, and taxation policies.

#### 10. Applicable NAV (after the scheme opens for subscriptions and redemptions)

The below cut-off timings and applicability of NAV shall be applicable in respect of valid applications received at the Official Point(s) of Acceptance on a Business Day (During Continuous Offer Period):

#### A] For Purchase (including switch-in) of any amount:

- In respect of valid applications received upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. credited to the bank account of the Scheme before the cut-off time - the closing NAV of the day shall be applicable.
- In respect of valid applications received after 3.00 p.m. and where the funds for
  the entire amount are credited to the bank account of the Scheme either at any
  time on the same day or before the cut-off time of the next Business Day i.e.
  available for utilization before the cut-off time of the next Business Day the
  closing NAV of the next Business Day shall be applicable.
- Irrespective of the time of receipt of application, where the funds for the entire
  amount are credited to the bank account of the Scheme before the cut-off time
  on any subsequent Business Day i.e. available for utilization before the cut-off
  time on any subsequent Business Day the closing NAV of such subsequent
  Business Day shall be applicable.

#### B] For Switch-ins of any amount:

#### 

- Application for switch-in is received before the applicable cut-off time.
- Funds for the entire amount of subscription/purchase as per the switch-in request are credited to the bank account of the Scheme before the cut-off time.
- The funds are available for utilization before the cut-off time.
- In case of 'switch' transactions from one scheme to another, the allocation shall be in line with redemption payouts.

For investments through systematic investment routes such as Systematic Investment Plans (SIP), Flex SIP, Systematic Transfer Plans (STP), Flex-STP, Swing STP, Transfer of Income Distribution cum Capital Withdrawal (IDCW) Plan facility (TIP), etc. the units will be allotted as per the closing NAV of the day on which the funds are available for utilization within applicable cut-off time by the Target Scheme irrespective of the installment date of the SIP, STP or record date of IDCW etc.

While the AMC will endeavour to deposit the payment instruments accompanying investment application submitted to it with its bank expeditiously, it shall not be liable for delay in realization of funds on account of factors beyond its control such as clearing / settlement cycles of the banks.

Since different payment modes have different settlement cycles including electronic transactions (as per arrangements with Payment Aggregators / Banks / Exchanges etc.), it may happen that the investor's account is debited, but the money is not credited within cut-off time on the same date to the Scheme's bank account, leading to a gap / delay in Unit allotment. Investors are therefore urged to use the most efficient electronic payment modes to avoid delays in realization of funds and consequently in Unit allotment.

#### C] For Redemption (including switch-out) applications

- In respect of valid applications received upto 3 p.m. on a Business Day by the Fund, same day's closing NAV shall be applicable.
- In respect of valid applications received after 3 p.m. on a Business Day by the Fund, the closing NAV of the next Business Day shall be applicable.

#### Transactions through online facilities / electronic modes:

The time of transaction done through various online facilities / electronic modes offered by the AMC, for the purpose of determining the applicability of NAV, would be the time when the request for purchase / sale / switch of units is received in the servers of AMC/RTA.

The AMC has the right to amend cut off timings subject to SEBI (MF) Regulations for the smooth and efficient functioning of the Scheme.
